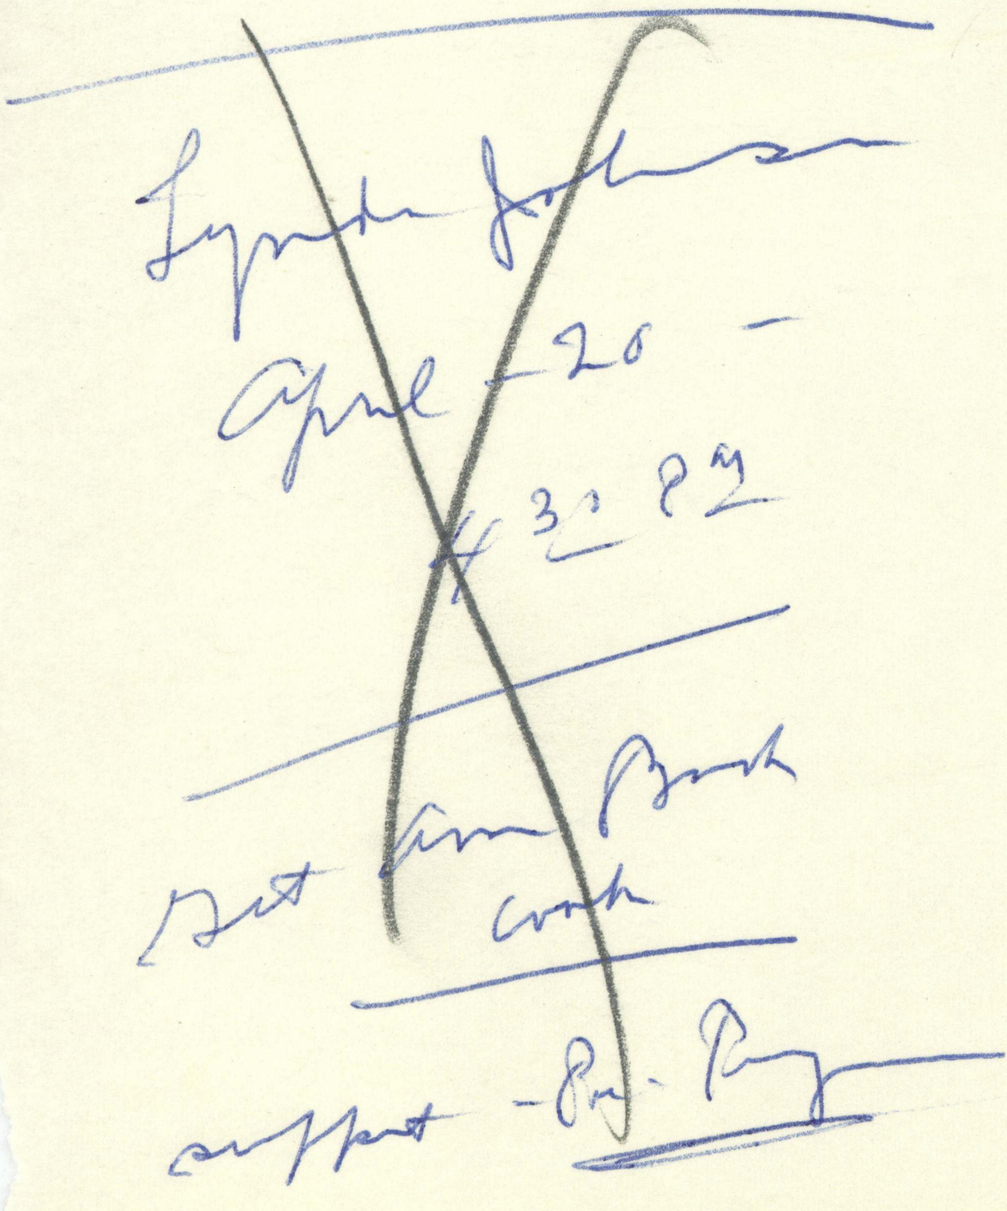
Vigor & Vision



[c. 1961]

1) A Proposal — to mobilize America's great economic potential — and harness the abundance of automation and full employment and full production to the challenge and rewarding task of a Total War for the Peace.

Peace — in our nuclear age — contains [redacted] the Soviet. Both the Soviet Union & the U.S. have a nuclear destructive capability of destroying every living thing on this planet. [redacted] Despite these stark reality of man capacity of total self destruction the arms race continues — at higher levels of more complex - more costly - and more deadly — destructive weapons. [redacted]

It is generally agreed that nuclear war is [redacted] unthinkable and that the knowledge of attack self destruct will deter any one from wilfully triggering a nuclear war.

2) The human folly — lives in fear and frustration that is the charged atmosphere of seeming crisis — Beneath a Berlin [redacted] [redacted] recorder war may be triggered by misunderstand and mis-communications [redacted]

The future of civilization may rest on our ability to shift the context from the stand arms race to a context of Peaceful Cooperation between our two great sys——.—

Mr K— is coming to Great Britain on ——— Wed aug 5-1961 —

stated in part ——

[redacted] [redacted]

[redacted] [redacted]

[redacted] [redacted]

3) Mr K - has outbuilt - 20 yr Prog
of Communist development - with free confidence
that Communism will prevail over Capitalism.
Mr K - confidence of the superiority of
Communism over Capitalism - is based
more upon our failures than his successes -
~~Mr K - has~~ -
Our system of Freedom is unequal to
challenge - if we try - we are in trouble
because we have not been trying.
During the last 8 yrs -
we wasted 20 trillion dollars -
have / 8 Presidents -
We wasted 350 B - has - RNP
has / 2 plus - the economy -
and failed to achieve 2% rate / economic growth of which we were capable and which was promised at the end of the Korean War.

4)

The law of 357 Bu RNP — is more than

merely a conjecture —

is a verified fact —

to the many, many

Mr K — knows that on last day

more than 50 % U.S. Steel capacity was standby —

and that our idle capacity

was greater than the total Soviet Steel capacity

Mr K - knows that despite — economic recovery

from the low point / the mean — 6.9 mil persons

still idle — and the Bureau Steel Industry

operating (51) capacity

This lag between — potential abundance —

full production — full employment — and reason —

5) The dimension / the problem — —

of how to achieve and maintain a

dynamic equilibrium free Enterprise free Press

economy will become increasingly complex

and difficult in the future ahead.

In the 60's, the 60—

13.5 million were unemployed in the 30's

25 million were employed by the program.

In all a total) 41 million have been employed

on projects $80,000,000 or more each. Of

not 40 yet ——— These are not the not

count — the 5.1— were employed.

This is both the challenge / our

problem and the hope / our opportunity.

The Arts — fundamental

asset — if fully employed it is good
